
Common Record Layout

VOLUME II SECTION

This section provides the Common Record layout table, which lists the valid tags that can be used in XML Schema version 4.0a as well as their valid values. Additionally, this section provides standards for the physical layout of the Common Record XML Document file. Standards on the physical layout of the Common Record XML Document file are required to ensure all systems transmitting or processing an instance of the file can do so without encountering physical constraint errors.

Introduction

This section provides the Common Record layout table, which lists block information grouped according to the following column headings:

- Field Number - Lists the Common Record field number
- COD Data Field – Contains the Common Record 2014-2015 tag name (Schema version 4.0a) and a description
- Minimum Length – Specifies the minimum length of the element
- Maximum Length – Specifies the maximum length of the element
- Nillable – Specifies whether or not the tag is nillable
- Data Type – Specifies the type of field (e.g. date, integer, string, boolean, etc.)
- Field Type – Specifies whether the field is a simple or complex element
- Complex Element Sequence – Specifies in which complex element and what order the tag is required to be submitted

For example: <DLSubsidized> (5th element) means that the tag is the 5th possible tag in the DLSubsidized award block.

It may not always be the 5th tag submitted, depending on whether the tags above it are required or optional but the tag will always come after tags 1, 2, 3, and 4 and before any tags listed as 6 or higher.

- Valid Field Values – Describes the acceptable content for a given Common Record element in order to pass XML schema validation
- Business Rules – Describes the acceptable content for a given Common Record element in order to pass various business rules

In addition to the main CommonRecord4.0a.xsd schema document there is also a supplemental XSD schema CommonRecord4.0a-VR.xsd document. This document is used to define certain value types called out within the XSD and the value ranges that are associated with them. For example in the main XSD schema document there is a type of value called LargeCurrencyType. Instead of redefining this type each time it exists in the XSD the VR document is used to define the type in each instance. In the VR the type appears as:

```
<xsd:simpleType name="LargeCurrencyType">
  <xsd:restriction base="xsd:decimal">
    <xsd:minInclusive value="0"/>
    <xsd:maxInclusive value="999999999999.99"/>
  </xsd:restriction>
</xsd:simpleType>
```

Required Fields

Refer to the *Minimum Data Elements Required for Document Processing* topic in *Volume II, Section 1 – Implementation Guide* for more information.

A brief note on Required vs. Optional tags in the XSD schema. Next to each complex or simple element in the XSD are additional details regarding if the element is required or optional. If minOccurs="0" is next to the element, then that complex or simple element is optional. If minOccurs="1" is not next to the element, then that complex or simple element is required (also note that it is possible for elements to have maxOccurs="#", in this case the element can only occur the specified

number of times per block). For instance, the Transmission Data element is required and is listed as follows:

```
<xsd:element name="TransmissionData">
```

However, the ReportedFinancialSummary element is optional:

```
<xsd:element name="ReportedFinancialSummary" type="cod:ReportedFinancialSummaryType" minOccurs="0" maxOccurs="120"/>
```

The ReportedFinancialSummary complex element is optional; however, if it is included, certain elements that pertain to the ReportedFinancialSummary type are required and some are optional (all complex elements within the Common Record have similar rules):

```
<xsd:complexType name="ReportedFinancialSummaryType">
  <xsd:sequence>
    <xsd:element name="FinancialAwardType" type="cod:FinancialAwards"/>
    <xsd:element name="FinancialAwardYear" type="xsd:gYear"/>
    <xsd:element name="TotalCount" type="cod:TotalCountType"/>
    <xsd:element name="TotalReportedAward" type="cod:LargeCurrencyType" minOccurs="0"/>
    <xsd:element name="TotalReportedDisbursement" type="cod:LargeCurrencyType"
      minOccurs="0"/>
  </xsd:sequence>
</xsd:complexType>
```

The intent of this Technical Reference is to describe the purpose and use of the COD Process and the Common Record. XML Standards are not presented here and should be obtained from other sources. The following is a representation of the Common Record content, for example, data elements, valid values and maximum field lengths. It does not represent the physical layout of the data transmission. The layout is depicted in a separate document, the XML schema.

Schema Version	Status	Schema Name
2.0e	Retired April 2014	NA
3.0a	Retired April 2014	NA
3.0b	Retired April 2014	NA
3.0c	Retired April 2014	NA
3.0d	Active	CommonRecord3.0d.xsd CommonRecord3.0d-VR.xsd
3.0e	Active	CommonRecord3.0e.xsd CommonRecord3.0e-VR.xsd
4.0a	Active	CommonRecord4.0a.xsd CommonRecord4.0a-VR.xsd

Schema Versions with Current Status

Beginning in April 2014, schools must use Version 4.0a of the Common Record XML schema for the 2014-2015 Award Year.

Also beginning in April 2014, COD will retire schema versions 3.0c, 3.0b, 3.0a, and 2.0e of the Common Record XML schema.

The Common Record Layout lists elements in block sequence. A general rule regarding sequence of data within blocks, and within complex elements: the start and end data tags and their context must be presented on the XML document within the block's tags or the complex element tags to which they belong. The sequence of the data within that block or element is dictated by the sequence of the data tags presented in the 'Block Sequence' column of this document and further shown in the XML schema. For example, if a complex element has ten simple elements within it, those ten elements must occur in the same sequence as listed numerically below according to their 'Block Sequence' and depicted in the XML schema. If there is any discrepancy between the information presented here and the information presented in the XML schema, the XML Schema should be considered as the correct source for the information.

DLGraduate PLUS Block

The Common Record XML Schema 4.0a includes a DL Graduate PLUS Block. This block is reserved for future use and will not be used for processing. As such, schools should not use the DL Graduate PLUS Block for Direct PLUS Loans made to eligible graduate and professional students.

Full Schema Enforcement

With the April 2014 release COD will perform full Common Record schema validation on all incoming Common Record batches. This full schema enforcement will pertain to all valid schema versions as of April 2014. These valid schema versions include 3.0d, 3.0e, and 4.0a. In the past exceptions have been made to allow certain invalid XML schema files to pass into the COD system. This will no longer be the case and batches with that do not pass full schema validation will not be processed by the COD system.

This means that all Common Record batches submitted to COD must follow exactly the Common Record XML schema outlined in one of the below documents.

If the batch specifies that it has been sent in the 3.0d schema version then the file must follow the schema presented in the following XSD documents:

CommonRecord3.0d.xsd
CommonRecord3.0d-VR.xsd

If the batch specifies that it has been sent in the 3.0e schema version then the file must follow the schema presented in the following XSD documents:

CommonRecord3.0e.xsd
CommonRecord3.0e-VR.xsd

If the batch specifies that it has been sent in the 4.0a schema version then the file must follow the schema presented in the following XSD documents:

CommonRecord4.0a.xsd
CommonRecord4.0a-VR.xsd

*Common Record batches specify their schema version using the <CommonRecord> namespace tag. See table below for an example of the proper 4.0a version. Proper namespaces for 3.0d and 3.0e schema versions can be found in prior year Common Record Layout documents.

Schema Version 4.0a Common Record Layout

Beginning in April 2014, the COD System will be updated to support Schema version 4.0a. Schema 4.0a includes the addition of tags relating to the Subsidized Usage Limit Applies project along with tags reserved for future use.

System-Generated Responses

Beginning April 2014, all Common Record documents for the 2014-2015 Award Year and forward must be sent by schools and will be acknowledged by the COD System using COD Common Record XML Schema Version 4.0a. System-generated responses include the following:

- BN Booking Notification
- CO Credit Decision Override
- ND Negative Disbursement
- PS Payment to Servicing
- PN Promissory Note
- AT Agreement to Serve
- EC Entrance Counseling
- SP PLUS Application Acknowledgement
- SU Subsidized Usage

Changes to Response Block

Schema version 4.0a will include changes to the Response block for Student. The following tags have been added:

- <SubsidizedUsageLimitApplies>
- <SumActualSubUsagePeriods>
- <SumActualNonCredTeacherCertSubUsagePeriods>

Changes have also been made to the response block for DL. The following tags have been added:

- <CalculatedPublishedPgmLengthYears>
- <AnticipatedSubUsagePeriod>
- <ActualSubUsagePeriod>
- <AcademicYearLength>
- <LoanPeriodLength>
- <MaxSubEligibilityPeriod>
- <RemainingActualSubEligibilityPeriod>
- <RemainingAnticipatedSubEligibilityPeriod>
- <SumAnticipatedSubUsagePeriods>
- <AnticipatedNonCredTeacherCertSubUsagePeriod>
- <ActualNonCredTeacherCertSubUsagePeriod>
- <RemainingActualNonCredTeacherCertSubEligibilityPeriod>
- <RemainingAnticipatedNonCredTeacherCertSubEligibilityPeriod>
- <SumAnticipatedNonCredTeacherCertSubUsagePeriods>

Changes have also been made to the response block for Pell. These tags are reserved for future use. The following tags have been added:

- <AwardLinkedExpectedFamilyContribution>
- <NewExpectedFamilyContribution>
- <NewPellEligibility>
- <NewCPSPProcessDate>
- <LinkedCPSPProcessDate>
- <NewCPSTransactionNumber>
- <NewScheduledGrant>
- <IssuedDisbursementAmount>
- <LinkedPellEligibility>
- <ProfessionalJudgmentFlag>
- <NewDoDMatchFlag>
- <LinkedDoDMatchFlag>

Changes to DLLoanInformation Block

Schema version 4.0a will include changes to the DLLoanInformation block. The following tags have been added:

- <PublishedPgmLengthYears>
- <PublishedPgmLengthMonths>
- <PublishedPgmLengthWeeks>
- <WeeksProgramsAcademicYear>
- <SpecialPrograms>
- <ProgramCredentialLevel>

Changes to Disbursement Block

Schema version 4.0a will include changes to the Disbursement block for DL, Pell, and TEACH. The following tags have been added:

- <EnrollmentStatus>
- <ProgramCIPCode>

Document Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
1	<CommonRecord xmlns=" " > Common Record: The root element for the document.	NA	NA	No	NA	Complex Element with Attribute	1st element in document	<CommonRecord xmlns="http://www.ed.gov/FSA/COD/2014/v4.0a" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xsi:schemaLocation="http://www.ed.gov/FSA/COD/2014/v4.0a CommonRecord4.0a.xsd">	<p>The attribute: "xmlns", and its value: http://www.ed.gov/FSA/COD/2014/v4.0a, are together used to indicate the namespace of the elements in the XML document. The namespace convention of COD incorporates the schema version indicator. The version indicator is the "/v4.0a" component of the namespace. When schema updates are made, the version indicator must reflect the update (e.g., "/v4.0a"). This attribute and value are required on all transmissions.</p> <p>The namespace must be used exactly as it appears in the Valid Schema Values column.</p>
2	<TransmissionData> TransmissionData: Nested immediately below the Common Record element, it contains the DocumentID, CreatedDateTime, Source, Destination, Software, and FullResponseCode	NA	NA	NA	NA	Complex Element	Within <CommonRecord> block, 1st element	NA	NA
3	<DocumentID> Document ID: The Date and Time stamp with the Source Entity ID. This tag maps to the Pell Batch ID and the Direct Loan Origination Batch Identifier, the Disbursement Batch Number, and the Change Batch Identifier	30	30	No	String	Simple Element	Within <TransmissionData> block, 1st element	CCYY-MM-DDTHH:mm:ss.ff99999999	<p>Submitting a DocumentID that is already in the system will result in a 003 batch level reject.</p> <p>Once initial information is submitted to COD, new content cannot overwrite the database.</p>

Common Record Layout
Document Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
4	<CreatedDateTime> Created Date and Time: The Date and Time stamp when the document was created.	0	None	No	Date/Time	Simple Element	Within <TransmissionData> block, 2nd element	CCYY-MM-DDTHH:mm:ss.ff	For 2014-2015 awards, the valid date range is from 2014-01-01 to 2016-10-05. Submitting a CreatedDateTime that is in the future will result in a 006 batch level reject. Once initial information is submitted to COD, new content cannot overwrite the database.
5	<Source> Source: This element provides a logical grouping of elements related to Document Information.	NA	NA	NA	NA	Complex Element	Within <TransmissionData> block, 3rd element	NA	Once initial information is submitted to COD, new content cannot overwrite the database.
6	<Destination> Destination: This element provides a logical grouping of elements related to Document Information.	NA	NA	NA	NA	Complex Element	Within <TransmissionData> block, 4th element	NA	Once initial information is submitted to COD, new content cannot overwrite the database.
7	<Lender> <Guarantor> <School> <ThirdPartyServicer> <COD> <Other> Complex element containing the Routing ID simple element that identifies data exchange partner.	NA	NA	NA	NA	Complex Element	Within <Destination> block, 1st element Within <Source> block, 1st element	NA	
8	<RoutingID> Routing ID: Element containing the unique identifier for each data exchange partner. This identifier is used by a translator to produce related identifiers (i.e., OPE ID, Direct Loan School Code, Reporting Pell ID, DUNS number, etc).	1	8	No	String	Simple Element	<Lendor> 1st element in block <Guarantor> 1st element in block <School> 1st element in block <ThirdPartyServicer> 1st element in block <COD> 1st element in block <Other> 1st element in block <ReportingSchool> 1st element in block <AttendedSchool> 1st element in block	1 to 99999999	Must be a valid unique identifier for each data exchange partner. COD will pad the Routing ID with leading 0's to reach 8 digits. The Routing ID of COD is 00000001.

Common Record Layout
Entity Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
9	<Software> Software: This element provides a logical grouping of elements related to Entity Information.	NA	NA	NA	NA	Complex Element	Within <TransmissionData> block, 5th element	NA	
10	<SoftwareProvider> Software Provider: This element indicates the software provider and product. Provider cannot be sent without the Version element.	0	10	No	String	Simple Element	Within <Software> block, 1st element		Software provider defined
11	<SoftwareVersion> Software Version: This element indicates the software version number.	0	6	No	String	Simple Element	Within <Software> block, 2nd element		Software version defined
12	<FullResponseCode> Full Response Code: This element provides a code allowing an override on Entity profile concerning the response document.	1	1	No	String	Simple Element	Within <TransmissionData> block, 6th element	Enumerated list, value must be: S, F,N, or M	Defaults to Standard Response if not included. S, N, M = Standard Response F = Full Response (standard plus original data)

Entity Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
14	<ReportedFinancialSummary> Reported Financial Summary: A complex element. This element provides a logical grouping of elements related to reported summary information.	NA	NA	NA	NA	Complex Element	<ReportingSchool> starting at 2, include an extra <ReportedFinancialSummary> block for each combination of Award Type and Year	NA	
15	<FinancialAwardType> Financial Award Type: This element indicates the award type. This tag is listed in the Reported Financial Summary and the Response Financial Summary complex elements.	NA	NA	No	String	Simple Element	<ReportedFinancialSummary> 1st element in block <ResponseFinancialSummary> 1st element in block	Must be one of the following values (enumerated list): Pell Academic Competitiveness Grant National SMART Grant TEACH DLSubsidized DLUnsubsidized DLPLUS Perkins* DLGraduatePLUS* – this is not a valid value for the Award Years 2006-2007 and forward Counseling* AlternativeLoan* FWSP* SEOG* * COD will accept the award type but will not process the record. COD will not return the award in the ReportingFinancialSummary complex element.	Once initial information is submitted to COD, new content cannot overwrite the database.
16	<FinancialAwardYear> Financial Award Year: This element indicates the year corresponding to awards. This tag is listed in the Reported Financial Summary and Response Financial Summary.	4	4	No	Year	Simple Element	<ReportedFinancialSummary> 2nd element in block <ResponseFinancialSummary> 2nd element in block	CCYY	Last year in cycle is used (i.e., 2015 corresponds to 2014-2015) Year > 2001 Once initial information is submitted to COD, new content cannot overwrite the database.

Common Record Layout
Entity Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
17	<TotalCount> Total Number of Awards: Total number of award tags in this document (can be duplicated). This information is summarized by award type by award year. This tag is listed in the Reported Financial Summary and the Response Financial Summary complex elements.	1	9	No	Integer	Simple Element	<ReportedFinancialSummary> 3rd element in block <ResponseFinancialSummary> 3rd element in block	0-999999999	Once initial information is submitted to COD, new content cannot overwrite the database.
18	<TotalReportedAward> Total Award Amount Reported: The total dollar value for awards reported in this document. This information is summarized by award type by award year. This tag is listed in Reported Financial Summary and the Response Financial Summary complex elements.	1	15	No	Decimal	Simple Element	<ReportedFinancialSummary> 4th element in block <ResponseFinancialSummary> 10th element in block	0-999999999999.99	Once initial information is submitted to COD, new content cannot overwrite the database.
19	<TotalReportedDisbursement> Total Disbursement Amount Reported: The total dollar value reported in this document. For Direct Loan, this is the total gross disbursement amount. This information is summarized by award type by award year. This tag is listed in the Reported Financial Summary and the Response Financial Summary complex elements.	1	15	No	Decimal	Simple Element	<ReportedFinancialSummary> 5th element in block <ResponseFinancialSummary> 11th element in block	0-999999999999.99	Once initial information is submitted to COD, new content cannot overwrite the database.
20	<AttendedSchool> Attending School Entity Identification: A complex element. This element provides a logical grouping of elements related to Entity Information.	NA	NA	NA	NA	Complex Element	<ReportingSchool> starting after the last <ReportedFinancialSummary> block and continuing until all <AttendedSchool> blocks per <ReportingSchool> have been reported	NA	NA

Person Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
22	<Borrower> Borrower: A complex element that provides a logical grouping of elements related to the borrower.	NA	NA	NA	NA	Complex Element	<DLPLUS> 20th element in block	NA	NA
23	<Endorser> Endorser: A complex element that provides a logical grouping of elements related to the endorser. Note: this tag is not currently in use.	NA	NA	NA	NA	Complex Element	DLPLUS <Response> 16th element in block	NA	NA
24	<Index> Index: This element provides a logical grouping of elements related to indexing information, which includes the SSN, BirthDate and LastName elements.	NA	NA	NA	NA	Complex Element	<Student> 1st element in block <Borrower> 1st element in block	NA	NA
25	<PersonIdentifiers> Person Identifiers: This element provides a logical grouping of elements related to identification information.	NA	NA	NA	NA	Complex Element	<Student> 2nd element in block <Borrower> 2nd element in block	NA	NA
26	<SSN> Social Security Number: The person's current Social Security Number. This tag, in the PersonIdentifiers block, can be used to change the stored SSN. If the content of this tag is different when comparing the Index and PersonIdentifiers block then COD will update the stored value as the value in the PersonIdentifiers block.	7	9	No	String	Simple Element	<Index> 1st element in block <PersonIdentifiers> 1st element in block	Must follow one of the following 3 patterns: XXXXXXXX XXXXXXXXX XXXXXXXXXX	Values ranging from 001010001 to 999999998 Values should not be submitted using dashes (-)

Common Record Layout

Person Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
27	<DriversLicense> Driver's License: This element provides a logical grouping of elements related to the Drivers License.	NA	NA	NA	NA	Complex Element	<PersonIdentifiers> 2nd element in block	NA	NA
28	<DriversLicenseState> Driver's License State: Attribute indicating the person's Driver's License State.	2	2	No	String	Simple Element	<DriversLicense> 1st element in block	Enumerated list provided within schema VR documentation.	NA
29	<DriversLicenseNumber> Driver's License Number: The person's Driver's License Number.	0	20	No	String	Simple Element	<DriversLicense> 2nd element in block		The valid business rule values are: 0 to 9; Uppercase A to Z; Space(s); *(Asterisk); -(Dash)
30	<SchoolAssignedPersonID> School Assigned Person ID: This is an institutionally defined identification number for the student.	0	20	Yes	String	Simple Element	<PersonIdentifiers> 3rd element in block		Institutionally defined.
31	<Birth> Birth: A complex element containing the BirthDate simple element.	NA	NA	NA	NA	Complex Element	<Student> 3rd element in block <Borrower> 3rd element in block	NA	NA
32	<BirthDate> Birth Date: The person's current Date of Birth. This tag, in the Birth block, can be used to change the stored Date of Birth. If the content of this tag is different when comparing the Index and Birth block then COD will update the stored value as the value in the Birth block.	10	10	No	Date	Simple Element	<Index> 2nd element in block <Birth> 1st element in block	CCYY-MM-DD	1915-01-01 to 2006-12-31
33	<Name> Name: This element provides a logical grouping of elements related to name information.	NA	NA	NA	NA	Complex Element	<Student> 4th element in block <Borrower> 4th element in block	NA	NA

Common Record Layout
Person Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
34	<FirstName> First Name: The person's first name. This basic component specifies the name given to a person at birth, baptism, or another naming ceremony, or through legal change.	0	12	Yes	String	Simple Element	<Name> 1st element in block		The valid business rule values are: Uppercase A to Z; Space(s); .(period); '(apostrophe); -(dash) COD will strip characters other than the ones listed above.
35	<MiddleInitial> Middle Initial: The person's middle name at one character (middle initial). This basic component specifies a person's middle initial.	0	1	Yes	String	Simple Element	<Name> 2nd element in block		The valid business rule values are: Uppercase A to Z COD will strip characters other than the ones listed above.
36	<LastName> Last Name: The person's current Last Name. This tag, in the Name block, can be used to change the stored Last Name. If the content of this tag is different when comparing the Index and Name block then COD will update the stored value as the value in the Name block.	0	35	Yes	String	Simple Element	<Index> 3rd element in block <Name> 3rd element in block		Uppercase A to Z; Space(s); .(period); '(apostrophe); -(dash) COD will strip characters other than the ones listed above.
37	<Contacts> Contacts: This element provides a logical grouping of elements related to contact information.	NA	NA	NA	NA	Complex Element	<Student> 5th element in block <Borrower> 5th element in block	NA	
38	<PermanentAddress> Permanent Address: This element provides a logical grouping of elements related to Permanent Address information.	NA	NA	NA	NA	Complex Element	<Contacts> 1st element in block	NA	Note: This element is required for the Borrower on Direct Loan PLUS originations.
39	<TemporaryAddress> Temporary Address: This element provides a logical grouping of elements related to Temporary Address information.	NA	NA	NA	NA	Complex Element	<Contacts>2nd element in block	NA	

Common Record Layout
Person Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
40	<AddressLine> Address Line: A line of the person's address. There is a maximum occurrence of three address lines for this tag. The sequence of this tag maps to the person's first, second, and third lines of address. This basic component specifies the local delivery information such as street, building number, post office box, or apartment portion of a postal address.	1	40	No	String	Simple Element	<PermanentAddress> 1st element in block <TemporaryAddress> 1st element in block	Maximum of 3 appearances per block for this tag.	The valid business rule values are: 0 to 9 Uppercase A to Z; .(Period); '(Apostrophe); -(Dash); ,(Comma); #(Number); @(At); %(Percent or care of); &(Ampersand); /(Slash); Space(s) COD will strip characters other than the ones listed above.
41	<City> City: The person's city.	2	30	No	String	Simple Element	<PermanentAddress> 2nd element in block <TemporaryAddress> 2nd element in block		The valid business rule values are: 0 to 9 Uppercase A to Z; .(Period); '(Apostrophe); -(Dash); ,(Comma); #(Number); @(At); %(Percent or care of); &(Ampersand); /(Slash); Space(s) COD will strip characters other than the ones listed above.
42	<StateProvinceCode> State/Province Code: The person's State or Province. This tag is required for a Domestic Address	2	2	No	String	Simple Element	<PermanentAddress> 3rd element in block <TemporaryAddress> 3rd element in block	Enumerated list provided within schema VR documentation. This tag is only used for domestic addresses.	
43	<PostalCode> Postal Code: The person's Postal Code (Zip Code).	1	17	No	String	Simple Element	<PermanentAddress> 4th element in block <TemporaryAddress> 4th element in block		The valid business rule values are: 0 to 9; Uppercase A to Z COD will strip characters other than the ones listed above.
45	<CountryCode> Country Code: The person's country. This basic component specifies the ISO standard 3166-alpha 2 Country code for the address. This is required for an International Address.	2	2	No	String	Simple Element	<PermanentAddress> 5th element in block <TemporaryAddress> 5th element in block	Enumerated list provided within schema VR documentation. This tag is only used for foreign addresses.	

Common Record Layout
Person Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
46	<Phone> Phone: This is a complex element that provides a logical grouping to information related to the phone number.	NA	NA	NA	NA	Complex Element	<Contacts> 3rd element in block		
47	<PhoneNumber> Phone Number: The person's phone number. There is a maximum occurrence of three phone numbers for this tag; however the COD System only stores the last occurrence of this tag.	7	17	Yes	String	Simple Element	<Phone> 1st element in block	Maximum of 3 appearances per block for this tag.	
48	<Email> Email: This is a complex element that provides a logical grouping to information related to the email address.	NA	NA	NA	NA	Complex Element	<Contacts> 4th element in block	NA	
49	<EmailAddress> Email Address: The person's email address. This basic component specifies the numbers, letters, and symbols used to identify an electronic mail (e-mail) user within the network to which the person or organization belongs. Follows the format of username@domain.	0	128	Yes	String	Simple Element	<Email> 1st element in block		The valid business rule values are: Any valid keyboard character including an underscore; but not the pipe symbol or space. If the field is not blank, an @ and a "." (period) to the right of the @ are required and a valid character must exist prior to the "." (period) and after the "." (period).
50	<Citizenship> Citizenship: A complex element containing the CitizenshipStatusCode simple element	NA	NA	NA	NA	Complex Element	<Student> 6th element in block <Borrower> 6th element in block	NA	

Common Record Layout
Person Information

Field #	COD Data Field	Min Length	Max Length	Nullable?	Data Type	Field Type	Complex Element Sequence	Valid Schema Values	Other COD Rules
51	<CitizenshipStatusCode> Citizenship Status: The person's citizenship status. COD will pull student citizenship status from CPS for all award types except DL PLUS. For DL PLUS, there is an override field for student citizenship status to allow schools to report correction information from documentation located at the school. For DL PLUS for Parents: The Citizenship Status Code nested under the student tag indicates the status of the student. The Citizenship Status Code nested under the borrower tag indicates the status of the parent.	1	1	Yes	String	Simple Element	<Citizenship> 1st element in block 1, 2, or 3	Enumerated value list, value must be one of the following: 1, 2, or 3	For all award programs, this value must be equal to either 1 or 2. Note: COD will pull this value from CPS for all award types. Valid only from 2006-2007 through 2010-2011 for ACG and National SMART programs. This tag is required for borrower of a DLP award. Value definitions for tag: 1 = U.S. Citizen (or U.S. national) 2 = Eligible noncitizen 3 = Not eligible
52	<Note> Note: This complex element contains the School Note Message simple element	NA	NA	NA	NA	Complex Element	<Student> 7th element in block <Borrower> 7th element in block <DLSubsidized> 5th element in block <DLUnsubsidized> 5th element in block <DLPLUS> 5th element in block <Pell> 5th element in block <TEACH> 5th element in block <AcademicCompetitivenessGrant> 5th element in block <NationalSMARTGrant> 5th element in block <Disbursement> 6th element in block	NA	
53	<SchoolNoteMessage> School Note Message: This tag contains cross-reference information useful to the School. This tag is located in the Person, Award, and Disbursement complex elements of the Common Record.	0	21	Yes	String	Simple Element	<Note> 1st element in block

Common Record Physical Layout

This section provides standards for the physical layout of the Common Record XML Document file. Standards on the physical layout of the Common Record XML Document file are required to ensure all systems transmitting or processing an instance of the file can do so without encountering physical constraint errors.

Examples of physical constraint errors include: exceeding available memory, exceeding available disk space, or exceeding available network bandwidth (and timing out). While most physical constraint errors can be avoided by proper coding techniques on the host system, there are some error conditions best handled through the definition of, and adherence to, a set of well-defined and well-publicized standards. Such error conditions and their corresponding standards for resolution are provided in this section.

XML and its associated technologies, (XML Schema, Document Type Definitions), do not provide for a mechanism to define the physical layout of a file. In fact, XML does not depend on the physical layout of the elements by design. White space and line lengths are not relevant to the logical construction and reading of an XML document. Therefore, the Common Record XML file physical layout standards are defined as guidelines and examples presented in this Section.

Line Length Limitations

32-kilobyte Line Length Limitation on Mainframe System

Some mainframe systems cannot create or read a line longer than 32 kilobytes. A line consists of a string of data with an “end of line marker.” The phrase “end of line marker” in this document refers to whatever mechanism is used on a platform to terminate an individual line or record. For example, an end of line marker can be set by the writing out of a record (on a mainframe), by inserting a <CR><LF> character sequence (on a PC), or by inserting a <CR> character (on UNIX). <CR> (carriage return character) and <LF> (linefeed) are ASCII codes 13 and 10, respectively.

Systems with this limitation cannot handle a string of data longer than 32 kilobytes without encountering some type of data corruption (most likely truncation). By rule, XML ignores white space, which includes tabs, linefeeds, and carriage returns. Since XML has no means to regulate line lengths, a separate standard must be set to ensure lines do not exceed 32 kilobytes.

9,999-byte Line Length Limitation on COD System

The COD System cannot process documents that contain over 9,999 bytes per line. A line consists of a string of data with an “end of line marker.” The phrase “end of line marker” in this document refers to whatever mechanism is used on a platform to terminate an individual line or record. For example, an end of line marker can be set by the writing out of a record (on a mainframe), by inserting a <CR><LF> character sequence (on a PC), or by inserting a <CR> character (on UNIX). <CR> (carriage return character) and <LF> (linefeed) are ASCII codes 13 and 10, respectively. COD will not process or acknowledge Common Record Documents that are submitted with a string of data greater than 4,000 bytes.

Line Length Limitation Solution

The solution, in its general form, is to make sure an end of line marker is always set before a particular output stream of data reaches 9,999 bytes. This end of line marker should be created in the format native to the system where the file is being created.

The data transmission software used by COD and by participating schools handles the translation of end of line markers across platforms. For example, if a file were sent from a PC to a UNIX box, the <CR><LF> character sequence would be automatically changed to <CR> characters. Therefore, the insertion of an end of line marker does not have to take into consideration the platform of the destination system. This same principle holds true between mainframes (EBCDIC or ASCII), PCs and UNIX boxes.

Standard

The following standard is a strongly recommended approach for schools and vendors who want to guarantee their files will not exceed the 9,999 byte limitation. If a school or vendor can ensure their submitted files will not exceed the 9,999 byte limitation by some other means, those files will be accepted by COD. However, the burden of responsibility will then rest with the school or vendor for files incorrectly submitted.

In order to ensure no line grows larger than 9,999 bytes, all Common Record XML files submitted to COD should be constructed with end of line markers inserted at specified points in the document. These points are tied to specific elements in the XML document. The points are:

- After the AttendedSchool element opening tag, <AttendedSchool>
- After every Student element closing tag, </Student>
- Before beginning an "Award" element opening tag, which could be <Pell>, <AcademicCompetitivenessGrant>, <NationalSMARTGrant>, <TEACH>, <DLSubsidized>, <DLUnsubsidized>, <DLPLUS>,

and the opening tags of all other elements designated as part of the Award substitution group in the Common Record XML Schema specification

- Before beginning a Disbursement element opening tag, <Disbursement>, for every disbursement under each of the "Award" elements listed above.

The Common Record XML Schema has been evaluated to confirm that if the above standard is maintained, the maximum size of the data sent in any one of these lines will never exceed 9,999 bytes. The maximum line size takes into account all tags, all maximum data lengths for each element, and all maximum numbers of repetitions of nested data elements.

The following example found is a skeleton submission file correctly formatted according to the end of line marker standards. In this example, for clarity, sub-elements are not listed, and the characters, [EOL], end of line, explicitly mark the end of a line.

COD guarantees the Response Document files it produces will not contain lines longer than 9,999 bytes, but the files will not necessarily match the line breaks as specified for submissions. This is due in part to the additional space used by the Response blocks.

Coding Guidelines

The code should track the Common Record elements as they are written to the output stream and write out a line of XML text (via the appropriate end of line marker) as any of the EOL points are encountered. Code to construct the Common Record can vary greatly depending on the platform, libraries, and languages used, so specific examples are not provided.

Common Record Response File Options

For more information on the length of COD Response Files, please refer to the School Options topic in *Volume II, Section 1 – Implementation Guide* for more information.

```
<CommonRecord><!--All Common Record sub elements -->
<ReportingSchool><AttendedSchool> [EOL]
<Student><!--All Student sub elements until an Award is encountered-->[EOL]
<Pell><!--All Pell sub elements until a Disbursement is encountered-->[EOL]
<Disbursement><!-- sub elements --></Disbursement>[EOL]
<Disbursement><!-- sub elements --></Disbursement>[EOL]
<Disbursement><!-- sub elements --></Disbursement></Pell>[EOL]
<DLSubsidized><!--All DLSubsidized sub elements until Disbursement is encountered-->[EOL]
<Disbursement><!-- sub elements --></Disbursement>[EOL]
<Disbursement><!-- sub elements --></Disbursement>[EOL]
<Disbursement><!-- sub elements --></Disbursement></ DLSubsidized
></Student>[EOL]
</AttendedSchool><AttendedSchool>[EOL]
<Student><!--All Student sub elements until an Award is encountered-->[EOL]
<DLSubsidized><!--All DLSubsidized sub elements until Disbursement is encountered-->[EOL]
<Disbursement><!-- sub elements --></Disbursement></ DLSubsidized
></Student>[EOL]
</AttendedSchool></ReportingSchool></CommonRecord>[EOL]
